

	1973	Company formed
	1982	Relocated to Crediton office and factory
	1986	Acquired Aquatrace
	1987	First Tubby produced
	1990	Invented FRO-BUT
	1991	Created Mineral Clinic
	1996	Launched Stokblok
	1997	Built 5th factory at Crediton
	2002	Acquired Chapman & Frearson and FSL Bells
	2005	Launched Brinicombe Equine
	2008	Acquired Lachlan MacGregor Feeds
	2009	ProSolve launched
	2013	Acquired Zintec
	2016	Launch StockGain Calf

Do you need technical support?

Speak to the mineral clinic™

The Mineral Clinic's highly trained FAR registered advisors, backed up by the technical department are on hand to answer freephone queries on all manner of on-farm ruminant issues.

Freephone 0800 374 325 enquiries@brinicombe.co.uk

Do you need a bespoke solution?

Try our mySolve service

Our team of nutritionists are here to advise on your unique situation. By evaluating your feeds and target requirements we can balance the inputs to suit your enterprise; ensuring optimal production is achieved. We formulate, manufacture and deliver your nutritionally engineered product.

Organic?

We offer organic products within our ranges and can advise on how our products comply to organic standards.

If you are a new customer and you would like find out more information on our products and how they can improve your livestock enterprise please contact the Mineral Clinic on 0800 374 325 or contact your local Territory Sales Manager to arrange an on farm consultation.

Orders can be placed over the phone

Direct Farm Advisors

Farmers nationwide rely on the Brinicombe Agri's team of dedicated Territory Sales Managers. Our FAR registered advisors are fully trained, with each member responsible for a particular area of the country to ensure we always offer locally specific advice.

TransAg Delivery Service

TransAg is the Brinicombe Agri's own dedicated, certified delivery service offering a prompt, professional service. Our state-of-the-art fleet of lorries operate out of nationwide depots.

Specialists in Animal Health & Nutrition | Celebrating over 40 years

Product Guide

The Denis Brinicombe Group have brought "nutritional engineering" to animal health products since 1973, benefiting livestock throughout the UK and across the globe. Our business has undergone many changes over the years, but we have remained a family owned operation, dedicated to creating new and innovative products to help farmers ensure a healthy and profitable livestock enterprise.

DBrinicombe

Livestock Health

Healthy animals are content and perform to their genetic potential. Our formulated range of health products are devised to overcome specific animal health issues. Each product is a carefully blended mix of targeted ingredients aimed to reduce the economic impact on the enterprise.

Nutritional Feed

Production relies on a balance of energy, protein and micronutrients. Our feed ranges are designed to balance and buffer shortages of these crucial nutrients, through free access or mixed in rations. These ranges not only provide a concentrated source of required nutrients but improve feed efficiency by utilising the full ration.

Mineral Balance

Our mineral products provide farmers with the opportunity to effectively balance their micronutrient shortfalls. This allows the animal to function at their optimum potential, to benefit the whole livestock enterprise.

Crop Preservatives

Our range of acids and inoculants target the nutritional qualities in forages and grain. This ensures a preservation in nutrients and reduction in waste, while enhancing the animals ability to best optimise the feed for production.

Tubby

Our Tubbys' use the unique method of the chemotaxis motion. Unlike other blocks and buckets, animals only take Tubby until their optimal requirement is reached. The concentrated composition of the Tubby allows the animal to achieve the targeted outcome through low intakes.

Sheep

- Tub Sheep**
Covering ewes and lambs at maintenance
- Tub Sheeps Feet**
Targeting hoof integrity
- FroBut & FroBut Plus**
Support for healthy skincare & appearance around the mouth & nose
- Coxi-Clear Ewe**
Pre-lambing coccidiosis control, with a prescribed level of Decoquinatone
- Coxi-Clear Lamb**
3 variations for coccidiosis control, targeting risks for lambs
- Bug-A-Tub**
Reduces parasitic attack and irritation
- Tub High Mag Sheep**
Aiding the prevention of grass staggers
- Tub Ram**
Complete nutrition for all ages of ram
- Tubbing Tubby**
Optimising fertility in ewes
- Super Tup**
Fertility aid for a tighter or earlier lambing
- Tub Toxo**
Toxoplasmosis prevention aid for pregnant ewes

- Tub Twin Lamb**
Aid to twin lamb disease prevention
- Tub Pre & Post Lambing**
Easier, faster lambing & vigorous lambs
- Tub Easi-Life**
Preparing the ewe to nurture the lamb
- Tub Lamb Finisher**
Promoting a fast finish for all lambs
- Tub Ron**
Specialised for Ronaldsay sheep, formulated to reduce copper toxicity

Organic Simply Green Range

- Suitable for all stock, containing seaweed for a source of natural micronutrients
- Tub Simply Green**
Maintenance coverage at grazing
- Tub Simply Green Fly**
Coverage at grazing with added garlic for summer conditions
- Tub Simply Green Mag**
High magnesium, aiding the prevention of grass staggers

Cattle

- Tub Cattle Conditioning**
Improving cattle condition, production & appearance
- Tub Cattle Protected**
Promotes first time inseminations
- Tub High Mag Cattle**
Aiding the prevention of grass staggers
- Tub Fly**
Reduces fly nuisance and irritation in cattle
- Tub Quick Serve**
Tighter calving for breeding cows & improved conception rates
- Tub Easi-Calver**
Faster, easier calving with strong calves
- Tub Easi-Calver + Fly**
Tub Easi-Calver with the reduction of fly nuisance
- Tub Coxi-Clear Calf**
Effective solution for coccidiosis in suckler & dairy calves
- Tub Suckler Licking Stone**
Helps promote fertility, condition and forage digestion in suckler cows
- Tub Calf & Breathezee**
Supports respiratory health
- Tub Beef Finisher**
Boosting energy & daily weight gains for a quicker finishing

Aquatrace

Concentrated micronutrient and problem solving applications aiming to boost animal health and performance

Sheep

- Ex-Sel Advance Topping**
Encourage energy metabolism at time of flushing while maintaining and elevating overall health
- Ex-Sel Advance Lambing**
Promotes birth of healthy, lively newborn lambs, helps when grazing on brassicas
- Ex-Sel Advance Weaning**
Premium drench boosting lamb performance at weaning. Will help reduce stress and any recovery from illness
- Footbath Solution**
Effective hoof care health for all stock
- Stockbooster Drench**
Multi-purpose drench for copper sensitive stock
- SHO Antiseptic Spray**
Skin, hoof & oral cleansing spray

Cattle

- Cow Capsules**
Single-dose trace element capsules for all cows
- Grazing Capsules**
Single-dose trace element capsules for grazing cattle
- Ex-Sel Cow & Calf Advance**
Premium micro-nutrition drench for cattle. Use for a boost at calving or weaning
- Nemlic**
Liquid feed wormer for cattle
- Calf Capsules & Crypto Capsules**
Newborn calf protection against digestive upsets
- 5 in 1 Calf Paste**
Premium newborn calf protection paste
- Water Soluble Tablets**
Administer trace elements via drinking water (5 different formulations)
- Acetona Liquid**
Unique ingredient to combat ketosis and aid the prevention of twin lamb disease

Contact the Mineral Clinic

on **0800 374 325**

For support on all Brinicombe Agri products

Sheep & Cattle

- Aquamag**
A palatable magnesium supply through addition into drinking water

Prosolve

The specialised problem solving range for top dressing and mixing in-feed

Sheep

- Hoof Care Sheep**
Targeted hoof hardening formula with zinc & biotin

Cattle

- Cattle Conditioner**
Promotes a healthy appearance in cattle
- Breathezee**
Supporting a healthy respiratory system in cattle for a lifetime of performance
- Udder & Hoof Care**
Reduces cell counts & hardens hooves with biotin
- Quick Serve**
Improves fertility & tightens the calving period
- Pre-Calver Omega 3**
Conditions and prepares all pre-calving cows
- Crina Nutripak**
Improves feed efficiency to increase cattle and sheep milk yield and growth

Sheep & Cattle

- Acetona Meal**
Cleansing the liver to reduce ketosis risk
- Yeast-Ex Nutripak**
Proven digestion enhancer for all stock
- Thrivon Omega 3**
Show conditioner for bloom & sheen

Feed

Liquid

Our fully formulated liquid feed is an ideal addition to improve rumen efficiency by stimulating microbial reproduction unlocking the potential of the ration, particularly the forages. Utilising the most cost effective feed to create the most economic option.

Our extensive liquid feeding equipment offers a practical solution to fit every situation.

Blocks and Buckets

An easy, low labour feed to buffer grazing and rations. Adds essential protein, energy and micronutrients for a one stop balancing option.

Our range of liquid feed, blocks and buckets nutritionally target the following issues...

- Forage Boosting**
Improve rumen efficiency to make the most of forage based diets
- Protein Targeting**
Match protein to maximise production by balancing the ration
- Energy Targeting**
A concentrated energy boost at times of need
- Magnesium Cover**
A palatable source of magnesium to cover staggers
- Palatability Enhancers**
Ration addition to reduce dust and enhance intakes
- Calving Relief**
Designed to aid ease of calving while reducing risk of milk fever
- Lambing Relief**
Formulated to reduce lambing related issues and aid the ease of lambing

Protein Concentrates

An economic way of adding feed value to home mixed rations for sheep & cattle.

MasterFeed Range

All natural proteins to maximise development of non-ruminating youngstock for a lifetime of potential

MasterBlend Range

A balanced combination of by-pass protein and urea from 50-100% total protein composition

- Aimed at enhancing the rumen output to make the most of a ration**
- A range of energy densities to target production levels**
- Yeast option to further elevate rumen health and efficiency**
- Fully mineralised to eliminate the need for further additions**

Minerals

A full range of mineral solutions formulated to balance rations and grazing, targeted at production requirements. Our loose bagged minerals are of a granular form to reduce dust, improve flow capability and perform as a free-access or in-feed option. Our molassed mineral buckets allow a low labour option ideally suited to grazing. We use high quality mineral ingredients to improve the availability to the animal, to best utilise the included essential nutrients.

Our range nutritionally targets:

- Improved fertility for ewes and cows**
- Magnesium sources for reduction of staggers**
- Calving for the well-being of the calf and cow**
- Lambing support to the ewe and lamb**
- Lactation to drive yield**
- Growing stock to build frame and bulk**
- Lameness by improved hoof condition**
- Overall balance of mineral shortfalls in forage based diets**
- Respiratory support to decrease stress and maximise production**
- Certified products for organic use**

Crop Preservatives

We have a range of bacterial inoculants and crimping additives to suit a variety of grain and forage preservation, reducing waste and maximizing nutrient retention. Our Biophage inoculants use elite bacterial strains to drop the pH more quickly than untreated silage, reducing the loss of energy, true protein & dry-matter.

Our crimping additives allow protection of high moisture grains, making available a high protein feed while ensuring optimum crop yields.

Forage

- Biophage Maize**
Biological maize silage preservative
- Biophage Wholecrop**
Biological wholecrop silage preservative
- Biophage X**
Pre-activating & doubling strength for an economic preservative of grass silage
- Biophage Gold**
Preservative for higher dry-matter grass silage
- Ultra Crop**
Aiding the prevention of mould and yeast in high dry-matter silage
- Ultra Crop Extra**
Ultra Crop with additional bacterial control, formulated for bail silage for sheep

Crimping

- Biophage Crimp**
Biological crimping preservative for all crop types
- Corsile**
Crimping additive to preserve grain
- Graintona**
Crimping additive to preserve grain & protect protein
